

# BREATHE EASIER...

## ...with a low dose CT Lung Screening!

Are you at risk for lung cancer? Breathe easier when you schedule a low-dose CT lung screening at Radiology Associates of Hartford. We are accredited by the American College of Radiology as a Low Dose Lung CT Screening Center.

### RISK FACTORS FOR LUNG CANCER:

- Tobacco smoking or secondhand smoke
- Contact with radon
- Contact with asbestos or other cancer-causing agents
- Personal history of certain other cancers
- Family history of lung cancer
- Having had other lung diseases

### Superior to chest X-ray

Studies have shown that current and former smokers, with a 20 year smoking history, ages 50-80 years old, evaluated with CT have a much greater survival rate than those evaluated with other methods. What's more, CT can find smaller, earlier stage and more treatable cancers than X-ray.

### Low Dose CT Lung Screening

Time is of the essence, so call (860) 969-6400 to make your appointment! *A written order from your doctor is required.*

**When:** Saturday, November 26th  
8:30am - 12:30pm

**Where:** Radiology Associates of Hartford  
Bloomfield  
673 Cottage Grove Road  
Bloomfield, CT 06002

**If you're at risk for lung cancer, put your mind at ease with this fast, easy and completely non-invasive test!**

### Who can be screened?

Screening for lung cancer is recommended for adults 50-80 years old who have a 20 pack-year smoking history and currently smoke or have quit within the past 15 years.
